

# BGP Community and Routing Policies

The Global IP Network at NTT Ltd. offers the most comprehensive set of BGP communities in the industry. Unlike many tier-1 global IP providers, we strive to be transparent with our routing policies and providing as much flexibility as possible. The matrix below offers a snapshot of our policies compared to those of other tier-1 global IP providers. These findings are based on publicly available information as of September 2023.

Our focus is on protecting our network and our customers. We believe it is our duty to act as good citizens by educating industry peers and encouraging the adoption of best practices to further our shared mission of a safer and more reliable Internet.

|  | NTT | Lumen         | Arelion | Cogent  | Zayo    | GTT     |
